

# Sliding Hill Road Widening Project Overview

**UPC #104957**

**STATE PROJECT #0656-042-812, P101, R201, C501**

**FEDERAL PROJECT #STP-5A27(610)**

## Project Description

The purpose of this project is to widen Route 656 (Sliding Hill Road) to a 4-lane divided roadway between Route 637 (Atlee Station Road) and Route 643 (New Ashcake Road). Sliding Hill Road is located on US bike Route 76, so the widening incorporates dedicated bike facilities. A 5' sidewalk will also be constructed in portions of the project with high pedestrian generators. A pedestrian signal and crossing will be added to the signal at Kings Charter Drive. Upgrades will be made to the traffic signals at Atlee Station Road, Kings Charter Drive and Air Park Road. The Department of Public Works urges drivers who use this section of Sliding Hill Road to consider alternate routes during the construction.

## Project at a Glance

Construction Cost: \$7,053,095.11  
Contractor: Curtis Contracting Inc.  
Engineer: Timmons Group  
Construction Began: September 2019  
Construction Complete: December 2020

The project is being financed using a combination of local, state and federal funds.

## Construction and MOT Schedule

The project's current schedule is:

- Construction Began: September 23, 2019
- Current Activities
  - Construction of Sliding Hill Road's interior lanes and medians beginning on the east end of the project (New Ashcake Road) and extending towards the west end of the project (Atlee Station Road) – Late July thru Late September 2020
- Future Activity
  - Construction on Sliding Hill Road's outer eastbound lane and sidewalk from Atlee Station Road to Kings Charter Drive – October 2020
- Estimated Construction Completion: December 2020

This Overview will be updated periodically with project details and traffic shift announcements. Major Traffic shifts will be announced on roadside message boards 2 weeks in advance. Lane closures requiring flagging will be limited to off peak hours (when feasible) generally between 9 am and 3:30 pm Mon-Sat.
