

Water Quality Testing Data Card

	Sample 1	Sample 2
Temp °C		
Temp °F		
Does the water temperature seem exceedingly hot or cold for this time of year? What might be causing the change?		
Dissolved Oxygen/ppm		
DO % of Saturation		
Is the level of DO appropriate for supporting life? If not what might be affecting the level of DO?		
pH (1- 14)		
Is the pH of the water in appropriate range for aquatic life? If not is the water too acidic or too basic? Is there any evidence of what might be changing the pH?		
Nitrates		
Is the nitrate level of the water sample high? Is there any evidence of what might be contributing to high nitrate levels in the samples?
